

Schweitzer Fachinformationen and Writefull join forces in DACH and BENELUX

Munich, 22th April 2021. Schweitzer Fachinformationen and Writefull, a subsidiary company of the technology corporation Digital Science, began their strategical partnership in April 2021. For the first time Schweitzer Fachinformationen offers a solution provided by Writefull for the domain of libraries belonging to DACH and BENELUX.

The new partnership of Schweitzer Fachinformationen and Writefull makes it possible to get tool based on artificial intelligence to improve academic writing in english language. Writefull offers an automatic language check product, perfectly fitted for the needs of academic institutions and libraries. The program supports in all essential areas of improvement of text quality in academic works. It points out flawed use of language directly in the text and gives suggestions of improved phrases. The underlying database of the tool was trained on millions of journal articles. Therefore grammar, language and punctuation of students' homework or a scientific paper at the academic institution can be improved by ensuring maximum of quality.

“Thanks to Writefull, coverage and influence of academic research in DACH and BENELUX will improve and expand tremendously. With this exceptional technical solution we are very pleased to offer new possibilities for students and scientists at universities and research institutions in DACH and BENELUX”, explains Philipp Neie, CEO of Schweitzer Fachinformationen.

“Writefull guides students and researcher with eloquent academic English throughout the whole process of writing texts. Beginning with papers of students over to research papers as well as research proposals and technical reports for scientists and lecturers. We are looking forward to the benefit of Writefull in institutes of DACH and BENELUX, made possible through working together with Schweitzer Fachinformationen”, Dr. Igor Osipov, in charge of Global Engagement, Academic & Enterprise at Writefull, underlines.

About Writefull

Writefull helps students and researchers with their academic English writing by giving deep and comprehensive language feedback. It uses AI-based algorithms that have been trained on millions of published papers. Thanks to this, Writefull's feedback is uniquely tailored to scientific & academic writing. Our institutional license offers access to a full suite of tools, including a Word add-in, an Overleaf extension, and web-based Writefull Revise and Writefull Cite, which help improve the text at the final stages and review and find missing citations and references based on semantics of the text. Writefull is there to assist students and researchers to write more accurately and confidently, and to get their outputs published in the best journals. Writefull also serves some of the world's largest publishers.www.writefull.com
